

DD/R-050-63

9 January 1963

MEMORANDUM FOR: Logistics Services Division

SUBJECT : Room GH-19

REFERENCE : OL-3-0047

1. We are aware of the critical space problem facing your office and regret the misunderstanding arising in connection with the DD/R occupancy of Room GH-19. As you may know, the recruitment program for the DD/R has been accelerated and we are now facing the problem of how to accommodate these personnel in the very limited amount of space available to us. For this reason, we are requesting that this space be made available through the end of February, at which time ORD will be relocated on the second floor.

2. The alteration of Room GE-78 is scheduled for completion on or about 31 January. If an urgent space requirement arises subsequent to that date, personnel now located in GE-19 could be housed in this area as an interim solution to our over-all space problem.
